Maxime Brucale

Cybersecurity engineering student – ECE Paris (4th year of a 5-year Master's-level engineering degree)

Internship: April 19 – end of August 2027 (4 to 5 months) – Paris area

maxime.brucale@edu.ece.fr · linkedin.com/in/maxime-brucale-b77041294 · github.com/Akaonii · myportfolio-mbrucale.vercel.app

SUMMARY

Four cybersecurity internships: SOC operations at the insurer Selencia (Microsoft Sentinel, KQL, EDR/XDR Cortex) and cyber threat modeling at HSBC. CompTIA Security+ and SC-200 in progress. Deployed projects, from intrusion detection with honeytokens to web security training.

EXPERIENCE

SOC Analyst Intern – Selencia (insurance), Paris Jan – Feb 2026 · 5 weeks

- Real-time monitoring on the Microsoft Sentinel SIEM (KQL queries): alert analysis and triage
- Security incident handling with EDR/XDR solutions (Cortex)
- Designed and built CVE Fix Redirector (JavaScript/Python)

Cyber Threat Modeling Analyst Intern – HSBC Continental Europe, Paris Jan – Feb 2025 · 5 weeks

- Identified the critical assets to protect within the information system
- Analysed potential vulnerabilities
- Designed strategies to reduce the identified risks

SOC Analyst Intern – Selencia, Paris Jun – Jul 2024 · 1 month

- Introduction to network monitoring, threat detection and incident response within the SOC

Risk & Cybersecurity Discovery Intern – HSBC Continental Europe, Paris Jul 2023 · 1 month

- Introduction to bank and customer data protection, the use of AI and the fight against cybercrime

PROJECTS

HoneyLink (ECE team project): honeytoken API that records every visit to a decoy URL, identifies the intruder's tool and alerts on intrusion spikes. FastAPI, Kubernetes, Istio, Helm, GitHub Actions, Trivy, Grafana; 61 tests, 99.6% coverage

Le Bureau des Failles (ECE team project, live): game for learning web security by exploiting then fixing flaws. Next.js, Supabase, RLS, in-browser PostgreSQL (PGlite); 590+ tests – ece-webtech-102.vercel.app

CVE Fix Redirector: looks up CVEs through the NVD API and points to the official fixes and advisories (FastAPI) – github.com/Akaonii/CVE-Fix

Ip-Tool: IP reputation through VirusTotal and AbuseIPDB, geolocation, blacklist (Python) – github.com/Akaonii/Ip-Tool

EDUCATION

ECE Paris – Engineering degree (Master's level), cybersecurity major 2023 – 2028

Ajou University (South Korea) – Exchange semester, Software and Computer Engineering Aug – Dec 2025

SKILLS

Security: SIEM (Microsoft Sentinel, KQL), EDR/XDR (Cortex), incident handling, threat modeling, vulnerability analysis, risk management

Cloud and DevOps: Docker, Kubernetes, Helm, Istio, GitHub Actions, Trivy, Ansible, Prometheus, Grafana

Programming: Python, C, SQL, JavaScript, TypeScript, Java, PHP, HTML/CSS · **Systems and tools:** PowerShell, Bash, Git, Kali

Certifications in progress: CompTIA Security+ · Microsoft SC-200 (Security Operations Analyst)

Certifications: CISO Leadership: Managing a Cybersecurity Program (Jan 2025) · Cybersecurity Awareness: Cloud Security – LinkedIn Learning

Languages: French (native) · English (advanced, TOEIC 885/990, B2) · Spanish (intermediate) · Italian (basic)

ACTIVITIES

EQCE – ECE, training and project lead (quantum computing track), since May 2026: designing and running training sessions on quantum fundamentals; leading student projects

Sports Office – ECE Lyon, vice-president, 2024 – 2025: inter-school sports events; managing a team of volunteers
